Responsibilities of FULL STACK DEVELOPER

- Build and maintain easy-to-use and performing websites, serving multiple partners across marketing and design
- Build and maintain design systems and component libraries
- Understand current requirements and translate them to scalable needs
- Understand the technical constraints of a project, and make pragmatic tradeoffs with stakeholders
- Participate in the full development lifecycle, including estimation, design, development, testing, and deployment
- Review and respond to operational issues, escalating as necessary
- Collaborate with IT and other stakeholders in owning & managing website infrastructure and stack

Requirements

- **3+ years of experience in web development**
- You are a specialist in website development and understand the nuances that contribute to an interactive experience
- You have experience working with non-technical stakeholders to understand the problems they want to solve

- You have excellent organizational skills with the ability to handle multiple projects in a fast-paced environment
- You have experience leading a project from start to finish, with the ability to prioritize, meet deadlines, and manage changing priorities
- **You have deep understanding of standard web technology, including HTML, CSS, Javascript, TypeScript, and React specifically REACT, REDUX, VUE and LARAVEL**
- Should know importance of web components and reusability.
- Should know how real rest and points and services work.
- **Understanding of NODJS and restful services and push to a cloud based service.**
- Should also know about continuous integration and release management. You understand the importance of accessibility and performance, such as code minification and media optimization
- You are proficient in QA and resolving cross-browser compatibility issues across desktop, tablet, and mobile
- You have proven experience with Content Management Systems, especially WordPress
- You have previously worked with in-house & external creative design teams, with demonstrated ability to turn high fidelity mocks into pixel perfect web pages
- You have excellent oral, written, and interpersonal communication skills
- You have demonstrated critical-thinking, decision-making, and problem-solving skills
- You are comfortable in a high-growth startup, can balance many simultaneous projects, and thrive in fast-paced environments

Bonus points if you have

- Deep understanding of web metrics for performance
- Experience with managing and leading a team
